

## A Vincennes University Academic Partnership Program

The Career Advancement Partnership (CAP) program includes a two-year degree in Electronics Technology that combines cutting-edge curriculum, paid work experience, along with learning technical skills which are highly sought by leading manufacturing partners.

### What Makes the CAP Program Different?

CAP allows students to receive hands-on experience in the classroom as well as a mentored, hands-on experience in the manufacturing environment. Students earn wages while working during the internship. With planning, the wages earned could cover the cost of tuition and books. The potential for grants and financial aid are based on your FAFSA application.

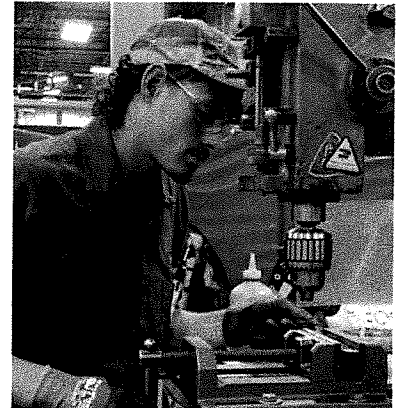

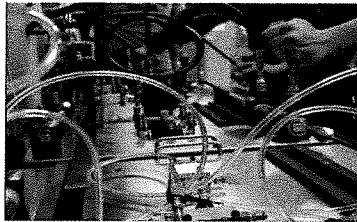

### How It Works

Students work two days a week at a manufacturing internship and attend classes three days a week at the Vincennes University Jasper Campus. Coursework includes exposure to CNC Programming and Operation, Manufacturing Processes, Introduction to Robotics and Automation, Electronics for Automation, Welding, Motor Control, Mechanical Drives, beginning CAD, PLC, Hydraulics and Pneumatics. Students completing the program coursework will earn an Associate Degree from Vincennes University Jasper. After graduation, your two year Associates Degree can be expanded to a four year Bachelor's Degree in fields such as engineering, technology, or business.

### Partner Companies

MasterBrand Cabinets • Indiana Furniture Industries • Jasper Engines and Transmissions • Farbest Foods • Kimball Electronics • Kimball International • Best Home Furnishings • Spencer Industries • Waupaca • Versteel • Dubois Equipment • Wabash Valley Produce • Cleveland-Cliffs Inc •

*Mission: To prepare the skilled technicians needed to program and maintain advanced technologies being adopted to stay competitive in the global economy.*

### How to Apply:

Go to [www.vinu.edu/cap](http://www.vinu.edu/cap)

Read details of the CAP program

1. Complete the Vincennes University Jasper Campus application process
2. Complete the CAP application
3. Take your Accuplacer test

Manufacturing partners will begin the selection process around the end of April. Candidates will be interviewed and selected for industry internships. We strongly encourage you to start the application no later than April 1st.
